

# WIRELINER PRESSURE CONTROL

# PCE PACKAGES

GSI offers a variety of Offshore Wireline Pressure Control Equipment (WPCE) Rentals and packages to meet the vast array of customer needs. All equipment is manufactured by well-respected industry suppliers. Our fleet contains both Standard and Sour Service WPCE ranging from 3" to 7.625". Applications range from Deepwater Completions and Well Production Intervention to Plug Back and Abandonment. Offerings also include test pumps up to 15,000 psi for well site services.

## ADDITIONAL INFORMATION

Our WPCE undergoes rigorous maintenance and testing from the day it is manufactured throughout its serviceable life span. GSI quality control procedures follow OEM guidelines and meet API Q2 standards. These processes govern all internal rebuild, testing, and well site operations.

GSI is capable of meeting customer requests including complete rebuild, blast/paint, NDT, reassemble and pressure test. GSI can also recertify to our internal processes, providing all support COS documentation.
